## TECHNICAL SKILLS

Javascript, Python, React, Express, jQuery, Node.js, SQL, JSON, Mongo, Postgres Sequel

## PROJECTS

**Flash** - BCrypt, Cloudinary, Express EJS Layouts, Javascript, Sequelize.

Mern Stack application creating an environment for user to share pictures with others

- Data-modeling: developed many-to-many models that were able to return efficient data
- Cloudinary: developed code that updates the Sequelize database and the Cloudinary database simultaneously.

**Garagé** - Javascript, JWT tokens, Mongoose, React, Reactstrap

A MERN Stack application connecting users in a community around the idea of "Garage Sale".

Users are able to browse through online garage sales or host their own.

- Routing: Created fetch calls for 3rd party API's and routes to connect to back-end databases.
- CSS: Styled the project with theme colors and provided aesthetic layouts.

**Animania** - Javascript, Mongoose, React, CSS

Collaborated with 2 other developers to create MERN Stack application where users were able to search information on shows and create specific preferences via commenting /adding to playlists.

- Data-modeling: Created models for mongoose data to be accept/return efficient data
- Routing: Developed all routes on the back-end allowing for efficient data to be returned

## General Assembly

**Seattle, WA**

**Certificate: Graduation Certification**

**Graduation Date:** June 2020

General Assembly *Full-Stack engineering immersive course* is an intensive 12-week, 450+ hour program focused on development fundamentals, object-oriented programming, MVC frameworks, data modeling and team collaboration strategies.

## EDUCATION

**University of Washington, Milgard School of Business**  
**WA**

**Tacoma,**

**Degree:** *Bachelor of Arts in Business Administration*

**Graduation Date:** June 2019

## ALTERNATIVE EDUCATION
